

Dr. Mari Ann Callais AV Needs

Audio-Visual Needs for Dr. Mari Ann Callais

The needs are the same for all keynotes and programs of 100 or more.

- - **Cordless Microphone** on a boom stand.
- - **Cordless Microphone** on a regular stand
- - **Direct Box for Guitar Plug-In** or a microphone wire that can be used with an adapter.
- - **Podium and microphone** for the person doing the introduction, set to the side of the speaking area.
- - **LCD projector** with HDMI cord, screen, and support cart with electrical outlet for Speaker's computer. (Speaker brings own computer and appropriate VGA adapter).
- - **Sound connection** (headphone jack) for computer.
- - One small bottle of **water** for each presentation.
- Lighting is very important. Please choose a set-up where the stage or speaking area will be well-lit.
- Auditoriums:
 - Speaker prefers to work in front of the curtain area with a full or center-focused light wash; house lights down during the program.
- Ballrooms and Other Flat Rooms:
 - A raised speaking area is preferred, at least 8'x8'. Please focus any lighting available on speaking area. If no specific lighting is available, do the program with full lights up.
- Speaker has worked with every type of set-up imaginable. Whatever you can do to get close to these requests will work.
- If you have any questions, please call Mari Ann directly at (985) 215-1214 or email
- marianncallais@gmail.com
- Thank you
